

Why stop with news and traffic, why not just ban all the music channels too. I mean local radio stations play music too!!! This is ridiculous. Leave alone the right for an AMERICAN to choose what he or she listens to! I PAY for my satellite service each month and enjoy the WIDE variety of selections that AREN'T available in my local area. So because I choose not to listen to local radio, I have to go without my local weather and news...COME ON! What happened to the first amendment, FREEDOM OF SPEECH!!!! The FCC just doesn't want any competition, they want to monopolize the market.....this is a capitalist country....get with the program! If this bill is passed in the FCC's favor, I will be outraged and disturbed about it and will make my opinion known!!! How about the FCC go after the local radio stations that are doing such INJUSTICE to the art of playing music, delivering the weather and informing us about the news. Its local radio that makes us choose to PAY for satellite service in the first place. The FCC needs to realize that before getting all 'hissy' because someone else comes along and wants to actually do something RIGHT!
